

# CSV Bulk Upload Documentation

## Introduction

This documentation provides a comprehensive guide to the CSV bulk upload process for adding multiple business entries to the system. The feature is designed to simplify the process of adding multiple businesses at once, ensuring data consistency and reducing manual entry errors.

## CSV File Structure

The CSV file should contain the following fields:

- **category\_id** (integer): The ID of the category the business belongs to.
- **name** (string): The name of the business.
- **description** (string): A brief description of the business.
- **address** (string): The physical address of the business.
- **city** (string): The city where the business is located.
- **state** (string): The state where the business is located.
- **zip\_code** (string): The ZIP code of the business location.
- **phone\_number** (string): The contact phone number of the business.
- **website** (string): The website URL of the business.
- **logo** (string): The download URL of the business logo image.
- **cover\_photo** (string): The download URL of the business cover photo image.
